PROFESSIONAL SUMMARY

Computer Engineer and AI Prompt Engineer specializing in generative AI systems, large language models (LLMs), threat intelligence, cybersecurity, and AI governance. Experienced in open-source intelligence (OSINT), digital identity auditing, system diagnostics, and social engineering defense. Expert in prompt engineering, LLM application development, natural language processing (NLP), and rapid prototyping of scalable AI-powered applications. Research focus on algorithmic fairness and mitigating accent bias in Automatic Speech Recognition (ASR) and machine learning models. Skilled in blockchain development, Web3 architectures, smart contract ecosystems, NFT platforms, and production-ready digital asset pipelines.

CORE COMPETENCIES & SKILLS

- **AI / Machine Learning / Prompt Engineering:** Advanced Prompt Engineering, Large Language Models (LLMs), Generative AI, LLM Application Development, Natural Language Processing (NLP), Automated Logical Fallacy Detection, ASR Model Evaluation, Algorithmic Bias Mitigation, Generative Asset Pipelines, AI Governance
- **Cybersecurity / Threat Intelligence / OSINT:** Open-Source Intelligence (OSINT), Threat Intelligence, Digital Identity Auditing, Social Engineering Defense, Pretext Detection, Credential Verification, Hash Auditing, Security Artifact Analysis, Temporal & Geolocation Analysis, Deep Packet Inspection
- **Programming & Systems Engineering:** TypeScript, Node.js, Design Patterns, System Security Frameworks, Technical System Diagnostics, Hardware & Software Troubleshooting, Rapid Prototyping (Replit), Workflow Automation, Disaster Recovery
- **Blockchain / Web3:** Blockchain Development, Cryptographic Protocols, Bitcoin Ordinals, Taproot, Native SegWit, Runes Protocol, Solana, Hedera (HBAR), NFT Minting & Marketplaces, Crypto Payment Gateways, Smart Contract Ecosystems
- **Product & Design:** UI/UX Logic Design, User Onboarding Frameworks, Requirements Analysis, Financial Cost Analysis, Product Packaging Strategy

PROJECTS

NFTForge — AI-Powered Generative NFT Platform (Blockchain / Generative AI)

- Architected and prototyped an end-to-end generative AI platform for designing, minting, and trading prompt-generated NFT artwork on blockchain networks.
- Built generative asset pipelines for multi-character collections and designed UI/UX marketplace workflows for Web3 NFT trading.

Lazy App — Multi-Service Aggregator Super-App (Full-Stack Prototyping)

- Defined technical requirements and user onboarding architecture for a multi-service platform using rapid prototyping methodologies.
- Integrated ride-sharing comparison logic, QR inventory scanning, cryptocurrency payment gateways, and deep packet inspection (DPI) anti-VPN security controls.

Debate — AI-Moderated Social Platform (LLM / NLP)

- Engineered LLM-based automated logical fallacy detection and content moderation for structured debates using applied natural language processing.
- Designed VIP jury voting systems and interactive community engagement features for AI-assisted discussion platforms.

ASR Algorithmic Equity Research (Machine Learning Fairness)

- Developed research hypotheses and technical frameworks for data acquisition and bias mitigation in Automatic Speech Recognition (ASR) models, focusing on accent bias and algorithmic fairness.

WORK EXPERIENCE

AI Prompt Engineer & Digital Visual Artist — Independent / Freelance March 2023 – Present

- Designed and executed advanced multi-turn prompt engineering workflows for generative AI image models and large language models (LLMs).
- Built thematic NFT collections and generative art pipelines for blockchain marketplaces.
- Performed threat intelligence analysis, OSINT digital profile audits, and identity verification to detect social engineering attacks and fraudulent credentials.

Brand & Packaging Strategist — Gafasandals Jun 2025 – Present

- Led premium product packaging strategy and conducted financial cost analysis for materials sourcing and operational scaling.

National Youth Service Corps (NYSC) — Nigerian Bulk Electricity Trading Company (NBET) Oct 2023 – Oct 2024

- Delivered technical support, system troubleshooting, and operational problem-solving for energy trading systems and IT infrastructure.

Computer Engineer — Pearl Ikeja, Lagos Jun 2019 – Aug 2021

- Managed hardware maintenance, software security configuration, system architecture diagnostics, and endpoint security protocols.

EDUCATION

B.Eng. Computer Engineering (Second Class Upper Division) Aug 2017 – Sep 2023

Oduduwa University, Ipetu Modu, Osun State, Nigeria

- Awards: Speaker, Computer Engineering Department; Most Resourceful Student; NACOSS OUI Chapter Mathematics Brain Challenge Winner
- Relevant Coursework: Computer Systems Architecture, Software Engineering, Network Security, Digital Logic Design

High School Diploma (SSCE) Sep 2007 – Jul 2013

Command Secondary School, Suleja, Niger State, Nigeria
