PROFESSIONAL SUMMARY

Computer Engineer and methodical Prompt Engineer bridging the gap between generative AI systems architecture, threat intelligence, and applied AI governance. Combining a solid academic foundation in computer engineering, system diagnostics, open-source intelligence (OSINT), and threat auditing with advanced proficiency in AI prompt engineering and strategic problem-solving. Skilled in translating complex technical requirements into structured prompt frameworks to rapidly prototype scalable, multi-layered applications. Driven by a dedication to algorithmic equity, specifically researching and mitigating accent bias in Automatic Speech Recognition (ASR) models. Adept at designing complex user workflows, auditing technical systems and digital identities for social engineering threats, and developing production-ready digital assets within Web3 ecosystems.

SKILLS

- **Threat Analysis & OSINT:** Digital Identity Auditing, Open-Source Intelligence (OSINT), Social Engineering Defense, Pretext & Deception Detection, Security Artifact Verification (Credential & Hash Auditing), Temporal & Geolocation Logic Analysis.
- **Programming & Systems:** TypeScript, Node.js (Design Patterns), System Security Frameworks, Rapid Prototyping (Replit), Technical System Diagnostics.
- **AI/ML Engineering:** Advanced Prompt Engineering, LLM Logic Formulation, Automated Fallacy Detection (Applied NLP), ASR Linguistic Representation Evaluation, Generative Asset Pipelines.
- **Web3 & Blockchain Architectures:** Cryptographic Protocols, Bitcoin Ordinals, Taproot vs. Native SegWit Address Formats, Runes, Solana, Hedera (HBAR) Ecosystems.
- **Design & Strategy:** Workflow Automation, UI/UX Logic Structuring, Disaster Recovery Operations, Financial/Cost Analysis for Product Packaging.

PROJECTS

NFTForge (AI-Powered Generative NFT Ecosystem)

- Architected and prototyped an AI-powered platform enabling users to design, mint, and trade unique prompt-generated NFT artwork directly on the blockchain.
- Directed generative asset pipelines—including large-scale multi-character grids such as the "Project 001" humanoid geckos and pixel-art eagle variants—and designed structural UI/UX logic for marketplace integration.

Lazy App (Multi-Service Aggregator Platform)

- Architected the technical requirements and user onboarding framework for a global super-app leveraging rapid prototyping workflows.
- Integrated complex logic for ride-sharing comparisons, QR-based inventory scanning, crypto gateways, and deep packet inspection anti-VPN defenses.

Debate (AI-Moderated Social Platform)

- Engineered advanced LLM logic for automated logical fallacy detection to moderate structured text and community-hosted arguments.
- Designed structured mechanics for VIP jury voting systems and interactive video poetry arenas.

ASR Algorithmic Equity Research

- Formulated complex research hypotheses to map out data acquisition solutions and technical frameworks for mitigating accent bias in Automatic Speech Recognition (ASR) models.

WORK EXPERIENCE

AI Prompt Engineer & Digital Visual Artist — *Independent/Freelance*

Jan 2025 – Present

- Executed advanced prompt engineering for precise multi-round edits and developed comprehensive thematic NFT collections.

- Conducted threat intelligence, OSINT digital profile audits, and identity verification logic to defend against remote social engineering tactics and deceptive credentials.

Brand & Packaging Strategist — *Gafasandals*

Jun 2025 – Present

- Developed premium packaging strategy and conducted detailed financial cost analysis for operational material scaling.

National Youth Service Corps (NYSC) — *Nigerian Bulk Electricity Trading Company*

Oct 2023 – Oct 2024

- Provided technical problem-solving, operational assistance, and system support.

Computer Engineer — *Pearl Pearl Ikeja, Lagos*

Jun 2019 – Aug 2021

- Managed hardware patching, software security protocols, and system architecture troubleshooting.

EDUCATION

B.Eng. in Computer Engineering (Second Class Upper Division Honors)

Aug 2017 – Sep 2023

Oduduwa University, Ipetu Modu, Osun State

- **Awards:** Speaker for Computer Engineering; Most Resourceful Student; Nigeria Association of Computer Science Students OUI Chapter (Mathematics Brain Challenge).

High School Diploma

Sep 2007 – Jul 2013

Command Secondary School, Suleja, Niger State
